Revalidation: Lessons and Progress from across the Tasman.

John Kolbe
Outline.

• Revalidation and CPD

• Rationale for revalidation/ CPD

• Next generation ("strengthened") CPD for RACP

• NZ initiatives.
Revalidation and CPD.

Regulator - Revalidation (Community)

Ensuring “good enough” physicians

Continuous Quality Improvement

College - CPD

Better Performing Physicians
Safe, Quality Health Care.
Community Accountability and Assurance.
Focus is on continuous quality improvement in performance
  - “Better” – Atul Gawande

Not primarily to detect underperformance
There is not a “problem to be fixed”

Common recommendations from UK enquiries
  - improvements in leadership
  - a positive culture and professionalism
  - promotion of quality of care
  - pro-active structured peer review
Detrimental effect of an early unsatisfactory experience.
Continuing Professional Development and Professionalism

• “What good physicians do”
  – take personal responsibility to be up to date
  – practice safe and high quality medicine
  – undertake continuous quality improvement
  – are accountable!

• Responsibility to the community
  – Core business for Colleges …and for physicians
    • “To serve the health of our people” – RACP
    • “Demonstrable professionalism”
    • Set standards, adhere, and “assure performance” (accountability)
    • Address community expectations
Perhaps the culture of accountability that we are relentlessly building for ourselves actually damages trust rather than supporting it. Plants don't flourish when we pull them up too often to check how their roots are growing: political institutional and professional life too may not go well if we constantly uproot them to demonstrate that everything is transparent and trustworthy.

Onera O’Neill
Reith Lecturer 2002
A Natural Evolution within RACP.

“Once in, good for life”

**CME (MOPS)**

- Professional Qualities Curriculum
- Tripartite Statement on Professionalism
- SPPP: Supporting Physician Performance and Professionalism
- Other

**myCPD**

Next Generation (“strengthened”) CPD

(Enhancing Physician Performance and Professionalism)
Concepts of an “strengthened” CPD/Revalidation Program:

- Emphasises “life-long” learning
- Involves all domains of physician activity
- Supportive/formative
- Evidence-based
- Focus on (self-)reflection
- Reflects current/future professional practice (setting and scope)
- Meaningful (to the physician who derives personal benefit)
- Achievable, without undue “cost”
- Integrates with existing systems and is scalable and sustainable.
Next Generation of RACP CPD.

- based on professional practice
- involve all domains (of SPPP)
- include components
  - continuous quality improvement
  - appraisal of performance
  - provision of feedback
  - professional development plan
Components of an “strengthened” CPD (&Revalidation) Program.

- Components
  - ....+ CME + Audit + Appraisal
  - all domains of SPPP
  - continuous quality improvement – irrespective of starting point
  - appraisal of performance…by feedback
    - from peers (MSF)
    - from patients
    - (from external reviewers)
  - provision of feedback; crucial component
  - “professional development needs assessment”
  - development of professional development plan
  - engagement in cycles of performance-driven learning.
Current Activities in New Zealand

• “What good physicians are already doing”
  – (Multiple) innovators and early adopters
• DHB stock takes …harmonisation of activity
• Other specialties

• Stakeholder engagement
• Formal trials of MSF and the “framework”
• Informal “trials” of instruments
• RACP Workshops
• Current discussions with MCNZ.
Meeting of Stakeholders; RACP, MCNZ, DHB CEOs, Chairs of DHB, Office of H&DC, Health Workforce NZ, National IT committee (and MBA)
“Do it once, do it right”.

Annual Performance Review: Hospital.

Revalidation; NZMC

CPD: RACP

(Advantages > Disadvantages.)
Meeting of Stakeholders; RACP, MCNZ, DHB CEOs, Chairs of DHB, Office of H&DC, Health Workforce NZ, National IT committee (and MBA)

Agreed on a collaborative approach; an integrated, efficient, consistent, system-wide approach would serve most of the needs of the parties

Led by the profession
Support for generic structure of the proposed process
Embedded in the workplace
That RACP should proceed with current plans for “augmented” CPD.
Stakeholder Engagement

• Meeting with CEOs of “central” DHBs
• Very keen to introduce a standardised performance framework for all SMOs
• Based on RACP framework
• Engagement of CMOs
• Enquiries from other DHBs

• “an idea whose time has come”. 
Patient Feedback Questionnaire; a Pilot Study.

- Modified from RCP Questionnaire
- Generic
- Addresses non-medical expert domains; especially communication, attitudes and behaviour
- Short: 9 questions.
- Pilot Study
  - Good face validity
  - Highly acceptable to patients
  - Administration feasible in out-patient setting

- Unforeseen benefits.
Integrated Performance Framework Pilot.

- Undertaken in Cardiology Dept, Waitemata DHB (Dr Tony Scott)
- Comprehensive programme; multiple methods and multiple exposures
- Use of externally-sourced MSF; (UK) bench-marked
- Use of experienced “peers” for feedback

- Employer-based program is feasible and well received
- Scalable and sustainable.
RACP Workshops

• Rationale
  – Evidence that the feedback, and how it is delivered is crucial
  – UK experience of “appraisers”
  – “Evidence-informed Facilitated Feedback” – SAFeR Research Team.

• RACP has developed workshops to up-skill in areas of
  – Provision of feedback
  – Support the reflective process
  – Identification of professional development “needs”
  – Development of professional development plan

• To be trialed in NZ centers; regional and metro
Audit of Medical Practice.

- **Requirement of MCNZ:** “Participation in audit of medical practice (at least one audit per year). This is a systematic critical analysis of the quality of the doctor’s own practice that is used to improve clinical and/or health outcomes, or to confirm that current management is consistent with current available evidence or accepted consensus guidelines......it involves a cycle of continuous improvement of care, based on explicit and measurable indicators of quality. It has a statistical basis.”

- Specific expectations unclear
- Focus should be on reflection and action, rather than collection
- Need effective data collection/IT systems in institutions to support audit
MCNZ Proposals re External Appraisal

• MCNZ: “……feedback from review undertaken by peers external to the doctor’s usual practice setting”

• Range from yearly “structured conversation with designated senior colleague” to Regular Practice Review every 3 years

• Previously proposed but generated opposition

• Activities of other specialties; O&G, Orthopedics

• Issues of:
  – Resources; human and financial
  – Feasibility; availability of reviewers
  – Training of reviewers
  – Standard setting
Final general comments.

- **Nothing new:** “I shall in an open and verifiable way…” Hippocratic Oath.

- **Culture change…from CME.**

- **Buy-in;** based on factors such as experience with the processes, validity of tools/processes, quality of feedback, perceived benefit etc

- **Need for leadership;** champions, role modes, ....
  - “The Fish Rots from the Head”, Bob Garrett.

- **Focus on the important aspects**
  - “Don’t sweat the small stuff”, Richard Carlson.

- “Go low, go slow, but GO.”

Do you have any concerns about the Probity or Health (physical or mental) of this doctor that may impact on patient care?
SPPP: Supporting Physicians’ Professionalism and Performance.

“Demonstrable professionalism”

To serve the health of patients, carers, communities and populations.
Remediation.

• Need a plan to address this issue! – 5% “just good enough”

• Needs to be
  – anticipatory and “preventive”
  – non-punitive
  – individualised
  – educational
  – aimed at returning doctor to full practice ASAP

• But………………
  – Time-consuming
  – Who sets “consistent” standards?
  – Who designs the program? Scalability of current processes
  – What does the interaction between the DHB, College and MCNZ look like?
  – Who “signs off”? ….and on what?
A Natural Evolution within RACP.

CME (MOPS) - great physicians

myCPD - + great professionals

Next Gen CPD - + great clinical leaders

Enhancing Physician Performance and Professionalism
Roles of the College(s).

- Core business for Colleges
  - “To serve the health of our people” – RACP
  - improved, affordable health outcomes for patients and communities
- Setting of standards
- “What good physicians do”
- Natural evolution
- “Demonstrable professionalism” to meet community expectations
- “Assuring performance” – standard setting and appraising performance including input of colleagues (and patients)
- Remediation of under-performance
RACP Benefits; Early

- Begins process towards next generation of CPD
- Allows the “road testing” of “new” CPD components
- Engagement of (the remaining) Fellows (and other stakeholders) in a “cultural change”; continuous quality improvement, (various) forms of appraisals, feed-back etc.
- College seen to “value add” in a practical manner on important issues
• Overall improved, affordable health outcomes for patients and communities
• Enhanced professionalism of all physicians
• Enhanced performance of all physicians
• CPD meets needs of physicians and emphasizes continuous quality improvement, appraisals, feedback etc.
• College role in setting of standards is enhanced
• College reputation is enhanced and its role is secure.
• Profession retains degree of self-regulation
• College produces “great clinical leaders” (3rd generation CME/CPD)
Challenges

• Single Process
  – “Do it once and do it right”
  – Similar objectives
  – Efficiency
  – Integration with professional activities
  – Disadvantages …..but outweighed by advantages

• Resource allocation
• Whole of system approach; all health professionals – managers and clinicians
• Remediation
  – of the “just good enough”
Revalidation & CPD; What’s in a name?

...all areas of professional practice....

..remain up to date..

......fit to practise....

...new knowledge, skills and behaviors...

...in accordance with .... standards...

...scope of practice...

...quality improvement....

remediation of poor practice...........

...assessment of an individual...

...keep up to date and competent...

...maintain and improve performance...

...address areas requiring improvement...

........response to need....
Role of the College in “the Process”

- Standard Setting
- Provision of a framework for CPD
- Provision of educational resource
- Engage and support Fellowship
- Establish collaborative partnerships
- Develop framework to address under-performance
- Avoid quasi-regulatory role
- Monitoring and evaluation
RACP Benefits

**Early**
- Begins process towards next generation of CPD
- Engagement of Fellows in the “cultural change” to continuous quality improvement, (various) forms of appraisals, feed-back etc.
- College seen to “value add” in a practical manner on important issues
- Able to “road test” important components of next generation of CPD

**Late**
- meets needs of physicians and emphasizes continuous quality improvement, appraisals, feed-back etc.
- Enhanced “professionalism” of all physicians
- Enhanced performance of all physicians
- College role in setting of standards for physicians is enhanced
- College reputation is enhanced and role is secure. Profession retains degree of self-regulation
- College produces “great clinical leaders” (3rd generation CME/CPD)
