More Doctors Smoke CAMELS than any other cigarette!

NOW...10 Months Scientific Evidence For Chesterfield

A medical specialist is making regular bi-monthly examinations of a group of people from various walks of life. 45 percent of this group have smoked Chesterfield for an average of over ten years.

After ten months, the medical specialist reports that he observed, no adverse effects on the nose, throat and sinuses of the group from smoking Chesterfield.

Detention harms children
Ending the abuse of children on Nauru: We must be better than this

Date published: 18 Aug 2016

We didn’t need more evidence of the terrible harms of detention, but we received it last Wednesday. Yet again the Australian public was confronted with thousands of examples of the daily trauma of life in the Nauru detention centre - incidents of child abuse, assault, sexual abuse and self-harm.
The Nauru files: cache of 2,000 leaked reports reveal scale of abuse of children in Australian offshore detention

Exclusive: The largest cache of documents to be leaked from within Australia’s asylum seeker detention regime details assaults, sexual assaults and self-harm.

Read the Nauru files in a unique database.
